EIN-O SCIENCE TECH-BASIC

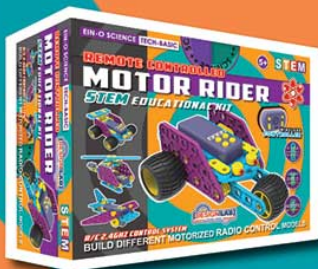

STEM
SCIENCE • TECHNOLOGY • ENGINEERING • MATH

Product Features:

- Interchangeable Parts
- Extendable on All 4 Box Kits
- Suitable for Multiplayers
- Inspire Mechanic Skills & Stimulate Creativity

Battle Robot (TB03)

Motor Rider (TB01)

Machinery (TB02)

Creature (TB04)

Ein-O Science promotes enlightening yet fun learning and creates visually engaging and intelligent learning materials. It offers a wide range of fun science activity kits for kids ages 6 and beyond. **Tech-Basic** series let children build different motorized radio control models, providing excellent STEM toy for teaching kids and can enlighten their interest to science.

Innovative Designs that Inspire Creative Minds

Founded in 2003, **COG Limited** is an innovative design company devoted to creating unique, educational STEM toys and other products that inspire imaginative minds. Located in Hong Kong, China, our team of professionals strives to infuse all **COG** products with a sense of innovation and imagination that our company represents.

Over the decades, **COG Limited** has successfully created a broad range of unique products which have become bestsellers worldwide. All our toys and products are educational and entertaining, and the raw materials we use are safe and environmentally friendly.

One of our more well-known brands is **EIN-O SCIENCE**, which promotes enlightening yet fun learning and strives to create visually engaging and intelligent learning materials. It offers a wide range of fun and engaging science activity kits for kids ages 6 and beyond. The success of the brand has encouraged further expansion of our products along with new, creative directions. The increased popularity of the STEM toys in recent years is further evidence that scientific knowledge is a crucial and relevant learning topic for children.

UPCOMING TOY FAIRS:

Nuremberg Toy Fair 2023
Booth No.: Hall 4A-A-35

We believe science can be incredibly fun for children, even outside classroom. So we've developed interactive, engaging science toys that promote education and fun at the same time. We encourage a "hands-on" approach that promotes dynamic learning and covers a wide range of useful, practical science themes. These themes include **air, water, magnets, chemistry, geology, outer space, and more**. All the activities actively engage children, whether through assembling electronic components, mixing chemicals, or piecing human organ models together. In this way, we present children not only with entertaining toys, but with learning tools that stimulate their **fascination and curiosity**. Every science kit comes with all the necessary tools and supplies for to conduct the experiments, as well as clear, easy-to-understand instructions. Children can learn about a wide range of educational principles through our science kits.

Our mission is to provide children with all these learning tools and to encourage them to explore the world of scientific knowledge. We will continue designing more unique tools and expanding our product line in the future.

The major product lines of **EIN-O SCIENCE** are:

COMPANY PROFILE

Business Overview

"Harmony, Honesty, Innovation, and Excellence" are the business motto of Eastcolight (Hong Kong) Ltd., a member of the Eastco Group, which was founded in 1991 and is credited with bringing high quality microscopes, telescopes, and other popular educational toys to the mass and specialty market.

Today, Eastcolight carries over 500 items selling to over 110 countries worldwide across different sales channel including importers, distributors, toy stores, department stores, school and museums etc.

Eastcolight's manufacturing operations are housed in a well-equipped, 600,000 sqft facility, and employs over a thousand of technically trained craftsmen, engineers, and a skilled labor force. Eastcolight's in-house capability includes product design, prototyping, tooling, injection, color-spraying, pad-printing, assembling, and warehousing. With much emphasis on efficiency and social compliance, the factory has attained the ICTI, ISO 9001, SA8000 and mainland 3C certifications.

Business Lines

Currently, Eastcolight owns 14 well established brands, including the core lines STEM®, AR STEM, Galaxy Tracker™, Micro-Science®, Tele Science®, Master of Spy®, e-Science®, Science Time® etc. The latest ranges of high-tech optical products Advanced Optics® and crime solving comprehensive sets SIF®-Special Investigation Force have been well received by customers as well.

We are currently working with world class licences, such as **Discovery Adventure** and **Dmax** to add more value for our customers.

Points to highlight

- ISO9001, SA8000 & ICTI certified factory
- Strong R&D with own tooling department
- New & innovative product launch every year
- 500 items with distribution to more than 110 countries
- Fully comply with the highest toy safety standards (EN71, ASTM, CPSIA, RoHS, Non-Phthalates, REACH)
- Professional, reliable & socially conscious vendor

Awards and Qualifications

Eastcolight's products are often found with supreme quality and highly innovative and they fully comply the highest safety standards in the toy industry including EN71, ROHS, CPSIA, ASTM, Phthalates, REACH, etc. The company and products have received various awards:

- <1> iF Design Award
- <2> A'Design Award
- <3> Dr. Toy Award
- <4> Mom's Choice Award
- <5> Guangdong Top Brand by the Chinese government authority
- <6> Silver Prize in the 11th Outstanding Toy Award by China Toys and Baby Articles Council
- <7> Gold Prize in the 10th Outstanding Toy Award by China Toys and Baby Articles Council
- <8> The Governor Cup Industrial Design Excellence Award by The Economic & Information Commission of Guangdong Province
- <9> The Best of the Fair: Educational Toys & Games of Hong Kong Toys and Baby Products Award 2013 by Hong Kong Trade Development Council

The achievements of the company was also featured as one of the successful stories by Hong Kong Trade Development Council on its 45th anniversary.

Eastcolight is a social responsible company and has been donating to various organizations, schools and hospitals, and sponsoring sport activities, etc. in Hong Kong and Mainland China. In 2011, our CEO has founded the Shen Wan Charity Association to raise money for the needed ones. Based on his prominent contributions to the public, he was awarded the Honorary Citizen of Zhong Shan City, China.

Through the emphasis on Quality & Efficiency, and the power of teamwork, Eastcolight keeps challenging herself to strive for excellence and to exceed consumers' expectations. With every effort, Eastcolight looks forward to building up long-term and mutually beneficial business relationships with you, our friends from all over the world.

Dynamic Scientific Ltd. is a joint-venture corporation formed by Citiwell Technology Ltd. and Tung Lick International Development Co, Ltd. Both firms have been manufacturing optical, scientific, and educational toys with their Zhongshan production site since the early 1990s. Based on their years of experience and know-how in this industry and having their design team and mold shop in the factory, they commit to developing innovative Optics and Science products with fun and educational elements. Their outstanding quality has won them a solid reputation and made them a well-known OEM and ODM partner. The extensive product line covers telescope, microscope, listening device, metal detector, speech globe, scientific kits, explorer kit, electronic gadgets, dinosaur microscope, etc., which is distributed to most countries worldwide, including North America, Japan, Europe, etc.

They discover that Western countries emphasize inspiration, while Eastern countries focus on memorizing, resulting in a lower desire for STEM toys in Asia than in Western countries. As a result, they have been aggressively pioneering STEM goods to drive STEM development in China's education sector. Over the years, Dynamic Scientific has focused all of its efforts on producing scientific and educational toys that have received standing ovations in the European and American markets. As reported by multiple media channels, their products are among the most highly recommended educational toys. The introduction of scientific and technological toys has been a massive success in Western countries since it increases children's desire to learn and explore the cosmos. Their key products, including telescopes, nano phones, metal detectors, and celestial globes, have been approved by families and received gold and silver awards for the exquisite toy.

With the rapid advancement of technology, Chinese people's educational requirements have gradually increased, leading to a positive extension of STEM in China. In addition to their company's long-term growth, they have expanded their brand into the domestic market and formed the branch company, Dynamic Scientific Ltd.

With their hard work in gaining astonishing achievement in the growth of scientific and educational toys, they always hope to propel the development of STEM toys in the international market. The company is always looking forward to different kinds of cooperation from partners worldwide to co-create extra value and mutually beneficial relationships.

Sustainable Development

Dynamic Scientific is committed to ensuring that its workers and suppliers have adopted ESG standards, run their operations ethically, and adhered to social compliance. The company is actively searching for ways to improve its products to reduce environmental impact and waste while meeting consumer needs.

Wenno International Ltd.

Email: info@shtoy.com.hk

Shing Hing Plastic Mfg. Ltd was founded in 1995. The company established a complete production line for animal toys, including product design, mold development and raw material development, etc. In 2014, Shing Hing founded its own brand, "Wenno", with the brand mission of "education through fun", making toys an educational tool for opening up wisdom and assisting learning of kids.

Nuremberg Toy Fair 2023
Booth No.: **Hall 5 - D35**

Wenno produces miniature and lifelike animal habitats by using real-world animal images as design elements and constructing simulated animal models for them through rigorous design and hand-painting. Simulated animal models, books, and the self-developed AR App, which integrates digital visual animal images and real-world environment, are some of their significant products. Through scanning the QR codes on the play cards, children are able to explore animal habitats, living conditions, and other useful information in Wenno's App, which turns mobile phones and tablets into high-end intelligent devices for children's early education. Wenno cultivates children's cognitive interest, observation ability, learning ability, scientific research ability, math ability, practical ability, and so on from an educational standpoint, so that children can learn diverse animal knowledge while playing.

Puzzle with Animal Figurine & AR Game Set

Wenno's products are positioned as parent-child animal teaching aids that have been sold in over 20 countries worldwide. It also has physical stores in Shanghai, Beijing, Hangzhou, Wuhan, and other Chinese cities. Various kindergarten and elementary schools have adopted it as teacher-approved education materials. Wenno created flagship stores on Tmall and JD in 2019 and developed a comprehensive online sales platform. It has supplemented domestic sales with its online retail channels, particularly during the months when the pandemic broke out. The company's performance has stayed stable in an unfavorable economic climate, while domestic performance in China has risen against the trend. As a Hong Kong brand, Wenno has built a reputable local

brand identity across the country as a result of the move of digitalization, allowing more people to get familiar with its own brand. It has blossomed into a publicly recognized toy brand after years of creating a wide exposure globally.

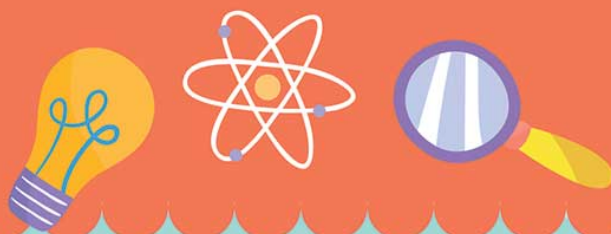

Festival Collection:
3D Animal Toy and
English Learning Box Set

Through cooperating with National Geographic Society, Wenno has become a global licensor of PVC simulated animal toys, covering the entire business chain from design to manufacture, distribution, and retail. Wenno also utilized its own design and production capabilities to standardize the components of these branded items, helping in an achievement of greater efficiency. Wenno is now the market leader in STEM toys sales by paving the path for the brand, leading automated production with technology, coordinating with hand-made elements, and galloping in the field of toys and education. Wenno is currently navigating business opportunities globally by exerting their professionalism in OEM and ODM services. They provide one-stop full service from structural design to production and logistics. Scalable and tailored solutions will be provided to best fit every customer's special needs. Whenever you have questions regarding their products and services, their friendly and passionate team is ready to assist you. Please do not hesitate to contact them!

Think & Act Strategic :

Think globally, act locally !

Think thoroughly, act promptly!

Base on this marketing strategy and mindset, Company has been growing over 20 years.

Our vision is to produce high quality toys through comprehensive service from design, product development, sourcing, manufacturing and quality control to delivery of goods.

Our mission is to assist customers in identifying products that best suit their market needs while providing good value and quality products.

Let children playing safety toys!

About Think & Act :

- Established in 1998

- Product Sourcing from 1998 to 2002

- OEM & ODM development and manufacturing of wooden toys for renowned toy brands and retailers from 2002

- Appoint HKPC to tailor-made the first R&D and quality control system for wooden toys in 2013

- Distributor of Goula wooden toys in Greater China in 2016

- Establish own DIY brand Kidowood in 2019

- Strategic Partner of Eric Carle and Ben & Holly License

Our Service

Product Development

With over 20 years toys sourcing and manufacturing experience, company has been providing expertise on developing unique products for our customers on OEM & ODM basis. Provide comparative price and style advise to customers where necessary.

Quality Control

With strong belief in providing good quality products to customers, company appointed Hong Kong Productivity Council to develop an unique R&D, production and quality control system for wooden toys. Our control system focus on specific issues of wooden toys that secure human mistakes to the minimum.

Our Products

Company would like to extend wooden toys popularity by applying wooden toys as media for family, gifts for care, tools for education.

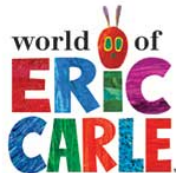

Goula - renowned Spanish preschool wooden toys expert. Accompany children playing from 1942. Teachers have been using them as educational tools since 1970's. With Spanish culture and character, Goula toys bring you colour, brightness, creativity, logic thinking and communication development ...

Kidowood – DIY wooden toys with accessories and books. Let children create and pretend !

License Product :

- Eric Carle
- Ben & Holly

Fame Master International Ltd.

Email: market@famemaster.com

Since founded in 1997, Fame Master has been specializing in designing, manufacturing and exporting plastic educational toys, puzzle educational toys and figurine toys of high quality and innovation on a worldwide basis. In 1998, we created our first figurine character "ALIEN Q", which was so well received by the kids and teenagers. Over 5 million pieces of figurine toys and wind-up toys had been sold through various channels, including fast food shops (e.g. KFC & HARDEES), chain stores, department stores, theme parks, etc., spreading all over the world.

In 2001, Fame Master developed the first 4 dinosaurs 4D PUZZLE educational toys, which are highly recognized for their authenticated look, museum quality of painting and finishing, novel and creative designs, educational while enjoyable and inspiring meaning contained in puzzle-building toys. In 2005, Fame Master has granted the Sole Agents right of our 4D PUZZLE educational toy products for some countries and areas over the world. Currently, Fame Master has developed a new toy line called, GEAR'X, which focuses on creative wind-up, pull-back and other gear-box toys. Both 4D PUZZLE and GEAR'X toy products have been established all over the world, including the United States, Canada, Germany, U.K., Northern Europe, Japan, South Africa, Southeast Asia...etc.

In future, Fame Master will keep on expanding the variety in both 4D PUZZLE educational toy and GEAR'X creative and fun gear box toy product lines, and we will give full scope to our creativity to serve the children and parents all over the world by providing them with more and more fun, inspiration and intelligence. Also, we will keep on co-operating with various licensed companies, such as the license holders of ULTRAMAN & DISNEY (and their Agents) utilizing our design and concept in high quality creative educational toys.

Learn through Playing is the BEST way

Panley was established in 2000, specializes in educational toys design and manufacture. We have more than 30,000 square meters of plant equipped with advanced printing machines and automated production facilities, providing one-stop services from die-cut mold, design, production, packing to delivery.

Our own brand, Learning Kitds, the first educational toys designed for all children, is the first choice for children in early development stage. The mission of "Learning Kitds" is to enable children to "learn while having fun" and let children have "smiley progress". Through the well-designed games provided by European professional designers, it provides unlimited entertainment for children in a "play to learn" mode and helps children to build up active desire for learning, master their self-learning ability and reject old -style memory learning mode. Our games and puzzle design emphasize on six elements: Mathematics, art, culture, cognition, science, and physics. Children can absorb all-round knowledge and learn in a "No Pressure" environment.

Product safety is our first priority, so we make continuous improvement from the beginning to the final stage of the manufacturing process to guarantee our products fulfill the international ASTM & EN71 safety requirements. Learning Kitds's products are committed to maintain superior quality and reliability which brings incredible trust to our customers. Our factory is certified by:

• C-TPAT Validation • GSV • ISO9001 • Sedex • FSC • BSCI • ICTI • NBCU

As a leading manufacturer of educational toys, we ship our goods to over 40 countries, including United Kingdom, Spain, France, Poland, Netherlands, Romania, Greece, United Arab Emirates, United States, Japan, Canada, Australia, China, Indonesia, Singapore, Philippines, Hong Kong etc.

Our toys have been tested by school children and reviewed by teachers with unquestionable educational value. Through rigorous testing, review and vote by consumers, parents and early education professionals, many of our products are awarded as great innovation and prestige design. We have been the winner of:

- 2017-2019 straight 3 years Creative Child Magazine Award Program
- 2019 Merit 5 Made in Hong Kong Award
- 2020 Tillywig Award Program
- 2021-2022 Hong Kong Smart Design Award

Brighten kids' future 😊

www.learningkitd.com

Our contribution to the STEAM and Educational Toy industry is approved by various circles of the society, which provides us motivation to devote all of our efforts in creating innovative learning toys.

“Learn while having fun” is our fundamental value in manufacturing STEAM toys so we perceive the importance of understanding the education trend and learning style of the Generation Z. We have actively participated in cultural exchanges forums such as Guangdong-Hong Kong-Macao Greater Bay Area Social Educational Summit, Greater Bay Area Chinese New Year Party and other education columnist station in promoting STEAM education, sharing the current global learning model, explaining how STEAM toys are widely used in schools as teaching materials and activity room games. We have devoted efforts to enhance the usage of STEAM toys to the public and the high educational value of our distinctive products, which has received explicit recognition in the educational sectors.

As a socially responsible company, we dedicate our endeavor to give back to the society by caring for the disadvantaged, which is our consistent aim. We have participated in the China Lions Club's warm-hearted operation, donated additional suppliers to Lugu Lake on the border of Sichuan and Yunnan, improved the learning environment of the poor children in the remote mountain area. For our product materials, we try our best to be environmentally friendly by using recycled materials, FSC certified paper stock and environmentally friendly inks for the production. We do not only manufacture learning products for kids, but also demonstrate a diverse range of corporate social responsibility to enact positive change and raise the public's awareness towards the children learning issues.

We will keep striving for progress in product development and extending our scope of services to reach out to potential partners around the world. We greatly welcome worldwide customers to cooperate with us and we have confidence to provide products with supreme quality to fulfill your requirement. Please feel free to contact us for any customized goods and services.
